Introduction

Research activity is an important component of any academic improvement plan, it constitutes one of the pillars of both the faculty mission and the Nursing program mission. As the nursing faculty has an approved strategic plan with clear goals and objectives, the assigned team under the guidance of the research activity coordinator has to put these goals and objectives into specific executive activities. Each faculty member is responsible for certain activity in the plan and both staff assistance and students are involved. This plan aims to integrate the research and scientific activities into the process of learning.

The applied methodology

- Appointment the responsible team.
- Reviewing the vision, mission and strategic objectives of the nursing college and program.
- Reviewing the study of community needs from different programs of Najran University. (Attachment 1)
- Access to the minutes of the brainstorming session regarding scientific research directions of different departments of the nursing program (Attachment 2).
- Develop a draft of the executive plan of research activities.
- Give feedback to faculty and staff members take their recommendations and suggestions.
- Design the final plan and submit it for approval from the College Council.

Nursing faculty vision and mission:

Vision:

Providing the community with highly qualified nursing professionals, excellency in scientific research and active participation in community service.

Mission:

Providing the community with highly qualified nursing professionals, able to peruse recent and emerging needs in the field of nursing, via the continuous improvement of the offered program, development of skills, support of the scientific research and active participation in community.

Nursing program mission:

Nursing program at Najran University is committed to:

- Provide the community with qualified graduates at the field of nursing.
- Offer a supportive, collaborative learning environment.
- Continuous improvement of the program to meet the national standards and to satisfy community and labor market needs.

Nursing program goals:

- Provide a quality nursing education, and integrate best practices in the field of nursing with a special stress on Islamic values and cultural concepts.
- Develop a Community engagement through service and research activities.
- Cultivate in the students a desire for lifelong learning and improvement.
- Support and improve faculty and staff performance.
- Engage in national and regional academic relationships that will promote our improvement.

Nursing college goals and strategic objectives regarding the research activities:

Goal:

Build a system for scientific research to meet the needs of the national community and convoy the international requirements.

Strategic objective:

Provide a supportive environment for the scientific research.

Project1:

Design a plan to improve scientific and research activities.

Project2:

Encourage and support scientific and research participations of the faculty and staff members.

College policies with respect to scientific research:

- The college affirms the importance of compatibility of all the research and scientific activities with the university standards and the financial budget that supports this kind of activity.
- The college supports research environment to meet the requirements of the beneficiaries and live up to their expectations.
- The college encourages cooperation with the health sector, and other scientific research bodies, and cooperation with universities and scientific research networks at the national and international levels.
- The college encourages the contributions of students in the research activities to improve their learning experience.
- The college encourages faculty to include information from their research and scientific activities into the courses they teach, after approval by the respective committee.
- The College is committed, in relation to the results of the researches, to all the regulations mentioned in the document of intellectual property rights and electronic publishing in Saudi Arabia.
